

# Forefront Identity Manager 2010 Training Roadmap

## What is FIM 2010?

Forefront Identity Manager 2010 (FIM 2010) is the newly branded development of Identity Lifecycle Manager 2007 (ILM 2007). This is the rebranded development of Microsoft Identity Integration Server (MIIS) and Certificate Lifecycle Manager (CLM).

FIM 2010 includes all the features of ILM 2007 plus a web service and a portal that can be used to manage users, groups, credential and policies.

## OCG are THE training people for FIM

Oxford Computer Group wrote the Microsoft courses for MIIS 2003/ILM 2007:

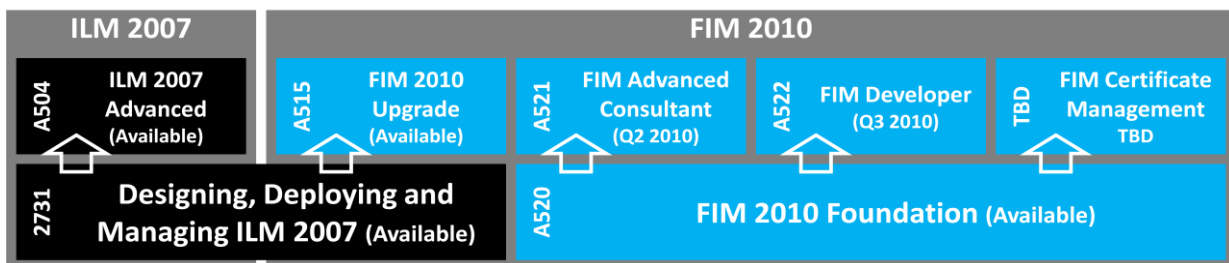

- MS2731: Designing, Deploying and Managing MIIS 2003/ILM 2007 (4 days)
- A504: Advanced Implementer and Developer (4 days)

We have trained more students than any other provider in the world – more than 4000 over 5 years on 5 continents.

We have already written and delivered FIM 2010 training courses for Microsoft, and are developing a series of courses designed to equip users, consultants and developers with the knowledge they need to maximize the potential of FIM 2010.

## The FIM 2010 Course Roadmap

For those already well acquainted with ILM 2007, the FIM 2010 Upgrade Course is the obvious next step. For those who are new to ILM 2007, the FIM 2010 Foundation Course is your starting point. All classes are priced at \$2300 / £1470 / €1650 (+VAT where applicable) for individuals. Closed courses can also be arranged.

## Three Types of Delivery

- Classroom:** We run scheduled 4 day courses in the US, UK and Germany – including course manual and use of a PC to carry out labs and exercises.
- Live Distance Learning:** Through our training partners SQLSoft+ (in Seattle), you can join a class remotely from almost anywhere with a broadband connection (9am to 5 pm Pacific Time only).
- Self-paced Mentored:** From late 2009, some courses will also be available online to follow at your own pace. You will have an assigned tutor/mentor with whom you can interact by email or directly online.
